

# C-SERIES

## Standard Mobile Data Terminal with Integrated Keypad

For teams who want both a touchscreen (500 Nits, 8.4" resistive touch) and keypad, the rugged Comark C-Series Compact Mobile Data Terminal with Integrated Keypad is ideal. The ability to operate between -20°C to +50°C with a heater and support glove operation make this is a great solution for workforces in extremely harsh environments. And, of course, the entire C-Series can be customized with scanners, GPS, or other options, including custom mounts.

### TECHNICAL SPECIFICATIONS
