

C-SERIES

| Standard x86 Tablet

A rugged tablet with a stylus and optional device cradle, the Comark C-Series Standard x86 Tablet is ideal for field service sites from brick and mortar retail to construction that use edge gateways. The ability to operate in temperatures from -10° to 50°C (14° to 122°F) and a 500 nits, 4-point projected capacitive multi-touch screen make this mobile device a great choice for fleet-based workforces who deal with varied environments. And, of course, the entire C-Series can be customized with scanners, GPS, and other options.
