

# M-SERIES

## | Standard Touchscreen

Only the sizes are standard on the practical and incredibly useful Comark M-Series Standard Touchscreen. It has military-grade EMI/EMC, environmental, vibration, and shock testing, as well as membrane keys for the display control functions for easier use in harsh conditions. This hardworking display comes in 3 sizes with options for cost-effective resistive touch or front glass screens. Popular with aerospace/defense clients, it's also rugged and bulkhead or VESA-mountable, making it useful for building automation and safety as well as food processing. Plus, the entire M-Series can be further customized to meet specific industry or technical needs.
