

COMARK

TACTICAL EDGE

The force multiplier of
modern warfighting

From artillery to aviation, combat vehicles to soldier lethality, new aerospace and defense systems have been increasingly relying on custom-engineered tactical edge devices to achieve informational and operational overmatch.

Achieving this mission means putting critical information and the ability to act on it into the hands of warfighters, medical professionals, first responders, and others faster, more safely, and in more detail than ever before, even in the most remote environments.

For over 40 years, Comark has been meeting these needs with innovative, MIL-SPEC-compliant, vendor-neutral designs that:

- Build upon pre-configured base designs and in-house, U.S.-based manufacturing for faster time-to-deployment
- Include both the client as well as all internal stakeholders in solution design for seamless manufacturing, more effective customer support, and longer product lifecycles.

And, because of its combination of speed, design expertise, and manufacturing, Comark is also the best option for the tactical edge of the future, empowering big data analytics, artificial intelligence (AI), machine learning, and virtual reality (VR) at the edge with flexibility and cost-effectiveness.

COMMON USE CASES

- Ruggedized in-field computing
- Ruggedized in-vehicle computing
- Ruggedized manned and un-manned vehicle control (from drone to submarine)
- Supply chain & logistics automation
- Facility security and automation
- Munition's control

COMMONLY REQUESTED SOLUTIONS

- Mobile data terminals
- Variable action buttons
- Ruggedized mobile devices
- Industrial-grade node and panel computers
- Industrial-grade displays
- Tactical edge servers and storage devices
- Ruggedized desktops

FEATURED CERTIFICATIONS

- MIL-810-G
- MIL-STD-461 EMI/EMC
- MIL-STD-167 Vibration
- MIL-STD-901-D Shock
- ABS Type Approval based on IEC 60945
- UC/cUL Class I Div. 2 Hazardous Locations
- UL/cUL 508/UL 61010
- NFPA 72/UL 864
- IP65/66 NEMA
- IECEx/ATEX Zone-2/22
- UL 60950
- FCC Marking

ABOUT COMARK

Founded in 1974, Comark is one of the largest independent providers of custom-engineered, ruggedized edge computing and display hardware solutions in the world. Comark has deployed millions of units for clients in aerospace/defense, building safety and automation, food processing, government, healthcare/life sciences, logistics and transportation, manufacturing, marine, police/fire/EMS, manufacturing, retail, oil and gas, and other industries which require adherence to rigorous safety, security, performance, and reliability standards. That's because every Comark project has "Trust Built In"SM. Learn more at <https://comarkcorp.com>.
